organizational arrangements in modern market economies. In a certain sense it can be viewed as a deep remodeling
of the traditional microeconomic perspective. Problems of coordination and incentives as well as the trade-off among
alternative modes of organization will be at the core of the analysis. Insights on problems of innovation will also be on the
agenda. Although the course requires a basic understanding of the fundamental tools of economics, the orientation is
not technical but rather focuses on issues at stake. The goal is to provide students with a coherent vision of the diverse
organizational arrangements that structure economic activities of production and exchange in an increasingly globalized
environment.Matière51.0Matière36.0Unité d'Enseignement2.0ObligatoireMatière2.0À choix11
